I acknowledge the duty to disclose information that is material to the examination of this application, namely, the information where there is a substantial likelihood that a reasonable examiner would consider it important in deciding whether to allow the application to issue as a patent.

In compliance with this duty, there is attached an information disclosure statement in accordance with 37 CFR 1.98.

PRIORITY CLAIM

I hereby claim foreign priority benefits under Title 35, United States Code, §119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

I hereby claim foreign priority benefits under Title 35, United States Code, §119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on which priority is claimed.

Such applications have been filed as follows:

INVALIDITY OF ORIGINAL PATENT

That I verily believe the original patent to be partly inoperative or invalid by reason of a defective specification (37 CFR 1.175(a)(1)).

That the error listed above, which is being corrected, up to the time of the filing of this reissue declaration, arose without any deceptive intention on the part of the applicant. (37 C.F.R. §1.171(a)(2)).

The statement below specifies the reasons relied upon (37 C.F.R. §1.175(a)(5), and why the original patent is believed to be wholly or partly inoperative or invalid (37 C.F.R. §1.175(a)(1):

The original patent is believed to be partly inoperative or invalid because the last clause of claim 1 incorrectly states that the reversing positions are at the ends of the slot, and that the side positions are closer to the center of the slot. In actuality, the reversing positions are close to the center of the slot and the side positions are at the end of the slot, as explained in col. 4, lines 60-62 of the original specification.
